Everything you need to know about intensive Kingfisher cleans of industrial facility basement areas.

INDUSTRIAL CLEANING SPECIALISTS

Kingfisher Industrial Services offer efficient and professional deep cleaning of industrial facility basements.

Industrial basements are often overlooked when it comes to cleaning, even though they are often the **most problematic area for accumulating grime, oil and waste materials from the production process**. Basement areas can also often be a dumping area for disused machinery, scrap metal and debris.

Basements often serve to **cool raw waste material** from production, therefore it is imperative that dirt and grime does not disrupt this process, cause fires or cause excessive flooding.

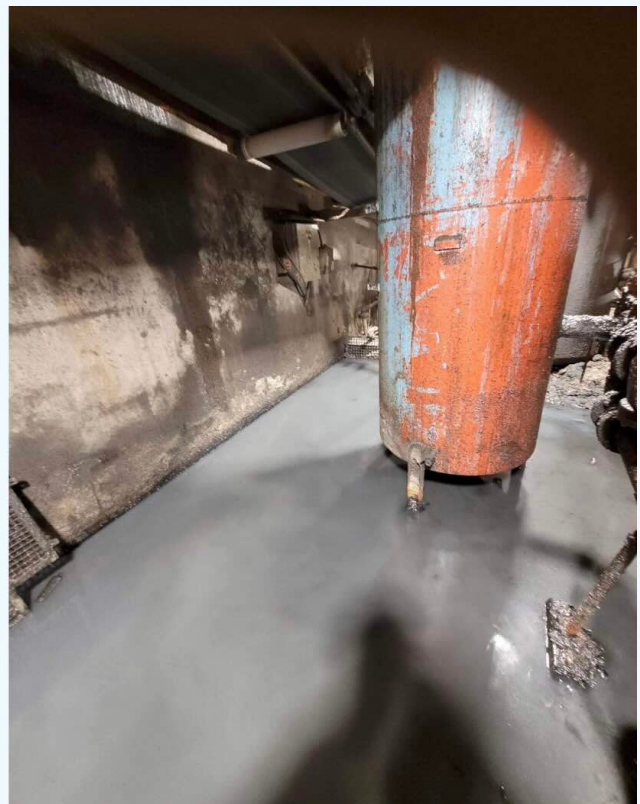

OUR SERVICES

Manual Waste Removal

Industrial basements are all different depending on the product being manufactured. However a commonality across the board is the build up of **grime, oil and piles of waste product**. Areas are often flooded with oily water, especially if drains become blocked with waste material.

We remove both large piles of material that have accumulated on the basement floor, as well as in intricate and hard to reach areas such as machinery and gridded platforms.

Our Kingfisher team is highly experienced in this type of work and we can deliver significant results in a competitive timeframe. We have the skills to operate expertly in challenging working environments while upholding the highest standards of Health and Safety.

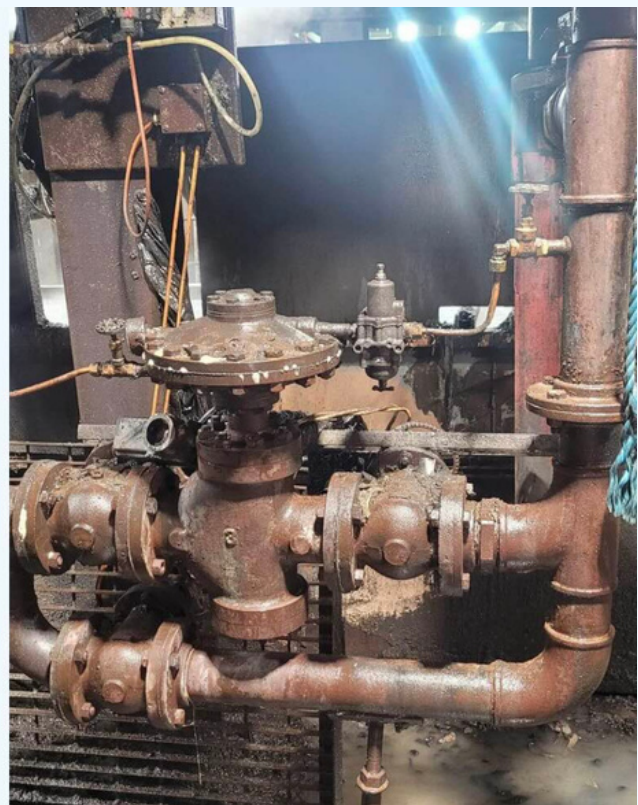

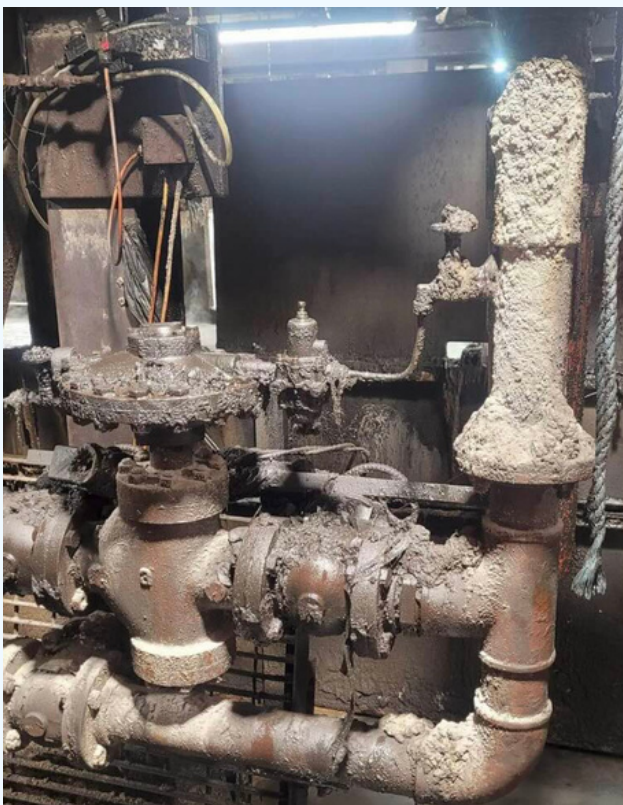

Kingfisher's specialism as a company is to **adapt our working method and equipment usage** to best suit the challenge at hand. We use high quality and specialised machinery to clean machinery and pipework in facility basements.

Depending on what is required for your facility, we clean the following:

- **Steelwork**
- **Pipework**
- **Drag chain boxes/ Zippee tanks**
- **Arrestor platforms**
- **Machinery control boxes, levers and buttons**
- **Floor areas**
- **Drainage channels**

We remove caked or dried residue from machinery and also from drains to free up any blockages.

**BESPOKE SERVICE,
QUALITY
EQUIPMENT**

**YOUR
KINGFISHER
PROJECT**

**40+ YEARS
OF TRUSTED
SERVICES**

**NATIONWIDE
COVERAGE, AT A
TIME CONVENIENT
TO YOU**

CASE STUDY

GLASS MANUFACTURER BASEMENT CLEANING

We have provided industrial cleaning services for the glass manufacturing industry for over 18 years.

Our team is highly experienced in basement cleaning for glass container manufacturers. We remove tons of cullet and oily waste from various areas while maintaining the highest standards of Health and Safety, in areas that are often flooded and obstructed by machinery.

Our manual waste removal services ensure that cullet conveyors, zippy tanks and drains can operate as normal as blockages are removed. Flooded areas are then able to be pumped out safely.
