BESPOKE PAINTING FOR INDUSTRY

“

Whether it's reviving tired external cladding, enhancing safety with colour coded flooring or protecting high value assets with robust two pack polyurethane systems, our team have the training and experience to deliver great results.

”

Our values

Our ethos here at Kingfisher is that if we cannot do a job well, we will not do it at all. We are committed to delivering exceptional quality for our industrial clients as well as upholding the highest standards of Health and Safety provision.

Our mission

Here at Kingfisher, we aim to consistently deliver quality services that offer outstanding value for money – all while maintaining the highest standards of Health and Safety.

Industrial painting demands a specific approach. It takes the right company with the right tools – but more than that, it requires tenacity and a team that's committed to doing the job properly and to an exceptional standard. *That's Kingfisher.*

HIGH LEVEL ACCESS PAINTING

We provide high level access painting services for cladding, external facades, walls, roofing and more, for industrial facilities across the UK. Protect your high-rise assets and breathe new life into your facility.

At Kingfisher Industrial Services, we specialise in quality high level access painting while prioritising safety and logistical provision. Protect your surfaces from corrosion while also boosting your company's branding and visual appeal.

- ✓ Fully MEWP Trained
- ✓ Protect Surfaces from Corrosion
- ✓ Cleaning, Rust Removal & Prep Included

FACTORY AND WAREHOUSE PAINTING

Dependable factory and warehouse painting services from industrial floors, to 60m high cladding, to specialist machinery.

Our comprehensive services cover all aspects of factory painting. Whether you need a fresh coat for branding or protective coatings for machinery, we have you covered.

If your project threatens to cause disruption or obstacles on site, we always implement every possible measure to reduce or avoid interruptions to your day-to-day tasks. This includes working around areas of high footfall traffic or working out of production hours.

EXTERIOR CLADDING PAINTING

Protect your external cladding from the elements while promoting your company's branding. We match superior surface protection with high quality aesthetics.

Our team combines years of experience with advanced coatings to ensure your building not only looks impressive but is also protected for optimal weather resistance. We also offer full surface preparation and rust treatment if needed.

We always implement every possible measure to reduce or avoid interruptions to site operations.

HIGH TEMPERATURE COATINGS

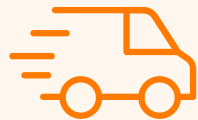

We provide high temperature resistant coatings to protect steelwork, machinery, furnace areas and other hot zones in industrial facilities.

One of our key areas of expertise is delivering safe applications of temperature resistant coatings in extremely hot areas of industrial sites, for instance around furnaces.

Our team adhere to strict RAMS and SSOW for all hot work projects.

INDUSTRIAL TANK & SILO PAINTING

Enhance both the durability and visual appeal of your industrial tanks or silos. We offer heavy duty two pack painting options for maximum protection and corrosion resistance.

We undertake thorough cleaning and surface preparation as standard. This ensures optimal adhesion of the coatings.

Our specialised two pack coatings provide robust protection against corrosion, ensuring the longevity of your silos and tanks in challenging environments.

RUST REMOVAL & CORROSION RESISTANT PAINTING

We understand the frustration with corrosion on industrial sites. Our services remove any built up corrosion and apply protective coatings to safeguard your assets for years to come.

Our team of accredited industrial cleaners and painters effectively and efficiently remove rust from infrastructures, walls, pipework, corrugated roofing, machinery and other surfaces across industrial facilities. Quality corrosion resistant painting can then protect your surfaces for years to come and can significantly boost the visual appeal of your assets.

“

"From start to completion Kingfisher gave me full confidence in being able to carry out the not so easy task in front of them, given the open conditions and rural location. All Kingfisher staff came to site on time and began inductions, they listened, reacted, and worked very efficiently and professionally, not at any time did anyone complain or slack off. Kingfisher came prepared with their own equipment (very impressive) and remained self-sufficient for the entirety. Safety, speed, and quality of works were paramount and I'm very pleased to say all three were delivered!"

”

Peter Robertson

ENGINEERING & PROJECT MANAGER, NOBLE FOODS,

CONFINED SPACE/ HAZARDOUS AREA PAINTING

We understand more than most how hazardous some areas on industrial sites can be, including basements, confined space areas, furnace/hot zones and more.

Our team are Confined Space trained and they work according to strict Health and Safety standards. This allows us to deliver high quality cleaning and painting results in hazardous areas on site. These works are high risk yet can vastly improve safety for the site and its employees. It is essential to partner with a professional company for this work, with a team who know what they're doing.

Get in touch with a few details about your project and we will arrange a free site consultation.

HEAVY DUTY TWO PACK PAINTING

Protect your industrial assets with two pack painting – industrial protective coatings for tanks, machinery and harsh environments.

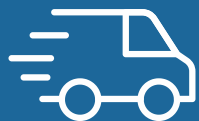

Two pack painting offers long term protection for harsh conditions and high value infrastructure, as regular single pack paint can't handle overly tough conditions.

Two pack paint forms a tough, chemically resistant barrier that stands up to: harsh industrial and manufacturing environments, high temperature areas, high moisture areas, frequent heavy-duty use and corrosive marine environments.

END OF TENANCY INDUSTRIAL UNIT PAINTING

If you're vacating an industrial unit, or completing a renovation project, our team offers combined cleaning and painting services to deliver exceptional quality with less fuss and hassle.

Is your industrial facility planning a renovation, CDM or special industrial project? Kingfisher Industrial Service's combined industrial cleaning and painting services offer a one-stop solution for industrial managers. Take the headache out of hiring multiple trades, and rest easy that your works are project-managed by a team of highly trained and experienced professionals.

THE PROCESS OF YOUR INDUSTRIAL PAINTING PROJECT

We understand that our clients' top priorities include the smooth and safe running of their day-to-day operations. Safety permitting, we ensure that all Industrial Cleaning Projects have the most minimal impact on our clients' production or day-to-day activities.

1. Get in Touch

Tell us about your project via telephone, email, or contact form on our website. One of the team will contact you to discuss your requirements further.

2. Free Consultation and Site Survey

One of our Operations Managers will arrange a time and date best suited to you to visit your site and assess the job.

3. No Obligation Quote

Our quotes plan for the highest standard of painting finish in an efficient timeframe, for a fair and high value price.

4. Work begins

We arrive to site having received permits and RAMS approval. All necessary tools and equipment are provided, including trained operatives, kit and PPE.

5. Regular Project Updates

Depending on the wishes of the client, regular updates shall be delivered throughout the project to ensure accountability and customer satisfaction.

6. Post-Completion Report

The client will receive a comprehensive report including progress photos, detailing all works completed.
